Foreword

The Quebec Region Statistics and Licensing Division has put together "**Quebec Marine Fisheries: 2003-2004 Highlights**" to provide a general overview of all the Quebec fisheries. This supplement is not intended to replace our Annual Statistical Review, but to be consulted in conjunction with it. We feel that this supplement will provide clients with an easy-to-use, accessible source of information about the main points of interest concerning the industry. Being an overview, it contains only the essentials, and we encourage you to refer to the Annual Statistical Review for more detailed information.

This publication is divided into two parts. The first presents a statistical summary of the main indicators of the fishery workforce and resources. A series of tables shows the changes in catches of the four main species landed in Quebec between 2000 and 2004. To provide a broader picture of the fishing industry, we have incorporated information on all the Atlantic provinces. The second section outlines the changes in average landings of the largest Quebec fleets for the years 1995 to 2004. Please see p. 91 of the Annual Statistical Review for an explanation of the method used to define the composition of each fleet.

Table of contents

STATISTIC SUMMARY

- Work force and resources sector-based distribution in 2003 for the Quebec Region	3
- Work force and resources sector-based distribution in 2004 for the Quebec Region	4
- Landing sector-based distribution in Quebec Region in 2003	5
- Landing sector-based distribution in Quebec Region in 2004	6
- Crab landings by area in Quebec Region	7
- Shrimp landings by shoal in Quebec Region	8
- Lobster landings by area in Quebec Region	9
- Scallops landings by area in Quebec Region	10
- Value of landings breakdown according by species in 2004	12
- Atlantic provinces landings in 2003	13
- Atlantic provinces landings in 2004	14
- Landings by administrative regions in 2003	15
- Landings by administrative regions in 2004	16

Table of contents

QUEBEC FLEETS PORTRAIT

- Explanatory notes	19
- Shrimpers, Group A	20
- Shrimpers, Group B	21
- Crabbers, area 12	22
- Crabbers, area 12 A	23
- Crabbers, area 12 B	24
- Crabbers, area 12 C	25
- Crabbers, area F	26
- Crabbers, area 14	27
- Crabbers, area 15	28
- Crabbers, area 16	29
- Crabbers, area 17	30

Table of contents

- Magdalen Islands lobster fleet.....	31
- Gaspé Peninsula lobster fleet	32
- North Shore lobster fleet	33
- Anticosti Island lobster fleet.....	34
- Longliners under 35 ft, Groundfish.....	35
- Longliners 35 to 50 ft, Groundfish.....	36
- Longliners over 50 ft, Groundfish.....	37
- Longliners under 35 ft, Pelagic fish	38
- Rock Crab	39
- Whelk	40

Statistical summary

**Work force and resources distribution for the Quebec Region
by geographical area in 2003**

Sectors	Number of registered active licence holders (2)	Number of active licence holders in Quebec (2)	Number of registered vessels (1)	Number of active vessels in Quebec (1)	Active quebecer vessels in Quebec	Number of commercial fishing licences	Number of buyers	Maximum number of employees in fishing plants
St. Lawrence	-	-	25	6	5	-	2	247
North Shore	373	383	462	304	290	1 669	24	984
Gaspé Peninsula	488	515	527	518	477	2 155	58	2 350
Magdalen Islands	387	392	394	387	381	1 774	15	791
Other	-	-	14	1	1	-	6	-
Total	1 248	1 290	1 422	1 181	1 119	5 598	105	4 372

(1) A vessel can be active in more than one maritime sector but it is entered only once within the total for Quebec.

The expression "active vessels" designates any vessel having made at least one landing in any particular area.

(2) Fishermen helpers are not entered anywhere. In this table, the data related to the St. Lawrence are

comprised with Gaspé and North Shore areas.

**Work force and resources distribution for the Quebec Region

Fisheries - Annual Statistics Review 2003-2004, 241 p.

Foreword

The hard times that the Quebec fishing industry has been experiencing in recent years underscore the importance of producing reliable statistics that are as up to date as possible. The requests for information that we receive have not only become more numerous and more pressing, but above all more complex. This is the background to this annual statistical report.

The nineteenth edition of the Annual Statistics Review of Quebec marine fisheries, produced by the Department of Fisheries and Oceans (DFO), paints a detailed portrait of the industry in 2003 and 2004. In a nutshell, in this last year, the volume of landings totalled 54 709 mt and had an associated value of close to \$162 million and in 2004 the volume of landings totalled 61 328 mt and had an associated value of close to \$190 million.

In the present edition, you will find a new section entitled: **“Statistical Profile of Seal Hunt”**. In this section we are presenting an overview of the activities related to seal hunt in the Quebec Region. You will find information concerning the number of licences issued per type and maritime areas as well as information concerning the landings of harp seal by fleet, and finally, data relating to the seal hunt observation activities.

A supplement entitled “Quebec Marine Fisheries: 2003 and 2004 Highlights” is included in a special pocket on the back cover. This handy, comprehensive reference tool was prepared jointly by the Statistics and Licensing Division and the Policy and Economics Branch to provide a snapshot of the state of Quebec’s fishing industry in 2003 and 2004.

The Statistics and Licensing Division, which is responsible for this publication, is mandated to compile, process, analyse and publish data on Quebec marine fisheries. The statistics produced are of vital importance, first, to assess and highlight the economic value of the industry, and second, to provide managers and scientists with a basis for the various analyses required for effective fishery resource management.

It is important to note that a federal-provincial agreement between DFO and the Quebec Department of Agriculture, Fisheries and Food (MAPAQ) has laid the groundwork for greater coordination in collecting data. It aims to eliminate duplication of effort by public servants seeking information from fishing industry players and to promote intergovernmental data sharing.

The three types of data in this report have been obtained in different ways. Catch data are based on the sales transactions between fishers and fish buyers when each vessel lands its catch. For data on fishing effort, used by scientists in their research work, we rely upon the excellent cooperation of skippers, who provided information on fishing grounds, type of gear, target species and species caught, among other things. Finally, statistics on fishermen, fishing fleets and licences come from the licensing process.

The quality of the data in this review depends on (a) the quantity of data that our system gathers from fishermen, buyers and processing plants, and (b) the accuracy of the data. With limited resources, the Statistics and Licensing Division does everything within its power to check the data it gathers, but cannot guarantee that everyone involved submitted all their data. We turn to resource management programs such as enterprise allocations (quota licences), for which strict monitoring methods exist, to ensure that data entered into the system are consistent with observations of landings by dockside monitors.

This does not however apply to every fishery. In addition to that, consultations with Inspectors, Protection Officers, Policy and Economics Branch representatives as well as with industry representatives further enable Statistics and Licensing Division staff to produce reliable, representative data.

The descriptive narratives accompanying the tables and figures are not intended as an in-depth analysis of the state of the marine fisheries in Quebec in 2003 and 2004.

The publication of this annual review of Quebec marine fisheries has been made possible by the hard work and rigour of the Statistics and Licensing Division staff and groups in Sept Îles, Gaspé and Cap-aux-Meules. We would also like to thank the Policy and Economics Branch for its important contribution.

We wish to take this opportunity to thank the fishermen, buyers and producers for their ongoing cooperation; knowing that supplying statistics is an extra burden for them.

All of us in Statistics and Licensing Division hope that you enjoy reading this annual review and welcome any comments or ideas that might help us improve it.

Methodology

The data in this publication are taken from the statistical system of Fisheries and Oceans Canada, Quebec Region. The system consists of three components, all of which were used to produce this report: catch-effort-quotas, people-vessels-licences, and processing plant production and workforce.

Data on people, vessels and licences come from licensing paperwork. The number of licence holders corresponds to the number of people registered with the Department of Fisheries and Oceans, who operated authorized fishing gears under the terms of a commercial fishing licence in 2003 and 2004. The number of vessels is the number of fishing boats licensed in 2003 and 2004. The number of licences is the total number of fishing licences issued, but not necessarily active, in 2003 and 2004.

Data on fish and shellfish landings are provided by commercial buyers, who are required to provide us with a copy of the DFO form to record their purchases from fishermen. Each transaction of this type generally corresponds to one fishing trip. The Enterprise Allocation Monitoring Program, initiated in 1989, now covers some mobile and fixed gear vessels less than 64' 11" and some 65'-100' long, for groundfish in areas 4RST and 3PN. The program also affects all crabbers and shrimpers, as well as many scallopers and surf clam fishers. For these fleets, an additional check has to be carried on the data supplied to the Statistics Service.

Furthermore, to estimate the volume of fish eaten by commercial fishermen and their families, the volume of fish sold directly to the public or used as bait and processed by fishermen themselves, we use data supplied by DFO fishery officers and information from fishermen's associations. **This type of data, called "supplementary purchase slips" is being included only in tables where we added a note to that effect.**

Data are gathered, coded and entered locally in each of the maritime sectors: Gaspé, Sept Îles and Cap aux Meules. The concepts and definitions used meet the standards set by the Statistical Coordinating Committee for the Atlantic Coast (STACAC) and are thus compatible with the systems of the other Atlantic regions (the Gulf, Nova Scotia and Newfoundland). Papers published by the STACAC provide more information on the concepts and definitions used here (see reference list). Some of them are available from Statistics Service at the Quebec City Regional Office.

Figures in the tables on landings have been rounded, so they may not add up to the totals shown.

It should also be noted that some data on salmon, eel, smelt, tomcod, capelin and sturgeon landings were supplied by the Quebec Ministère de l'Agriculture, des Pêcheries et de l'Alimentation (MAPAQ).

Another important point is that until 1992, seal-hunt licences were issued in the maritime sectors and did not figure in the publication of the various statistical tables on fishing licences. In 1993, the policy on licensing for the seal hunt was amended to make it much more like the ones for other types of licences, so seal-hunt licences are now counted the same way as other existing licences. To avoid skewing the trend analysis, we decided to publish the seal-hunt data separately. Statistical table 4A gives the number of seal-hunt licences according to quite specific parameters.

It should be noted that the process of gathering data at the source is the result of the Federal-Provincial Harmonization Agreement on the Quebec Marine Fisheries, the main objective of which was to eliminate duplication of effort in this area.

Maritime territory

Quebec maritime territory begins at the eastern tip of Île d'Orléans and is divided into four sectors.

The St. Lawrence sector extends from Anse à Gilles to Cap à l'Original (on the south shore) and from Cap Tourmente to Baie Sainte Catherine (on the north shore). The North Shore sector lies between Tadoussac and Blanc Sablon (including Anticosti Island). The Gaspé sector begins at Le Bic and stops at Matapédia. The fourth sector comprises the Magdalen Islands. For more details, refer to the map titled "Maritime Territory" on next page.

On another basis, the Quebec Region maritime territory is subdivided into 28 statistical districts. These districts are defined by limits represented by geographic points and are used in most statistical systems. This standardization makes it possible to compare the data that DFO has been collecting in Quebec since 1984 with those published by the Bureau de la statistique du Québec for previous years.

The 28 statistical districts, with their geographic limits, are listed in an Appendix.

N.B. The districts description are in the appendix 1

Conventional Symbols

o	Less than half of the smallest unit used
-	Nil or zero
%	Proportion of a quantity to another expressed as a percentage
Var. %	Percentage variation indicating the size of increases or decreases from one year to the next and calculated as follows:

$$\text{Var. \%} = \frac{\begin{array}{c} +--- \\ | \quad \text{figure from target year} \quad - \quad \text{figure from preceding year} \quad | \\ \hline | \quad \quad \quad \text{figure from preceding year} \quad | \\ +--- \end{array}}{\quad} \times 100$$

N.B.: All variations presented in this review refer to the years 2003 and 2004 only.

N/A	Information not applicable
N/AV	Information not available
mt	Metric ton
...	Not applicable because of different units
◇	Not publishable, because there were fewer than three buyers or fewer than three fishermen for this fishery (protected information)

Definitions of terms used in this publication

Active fisherman	Fisherman or fisherman's helper who has made at least one landing in the season.
Active fishing enterprise	Fishing enterprise that has made at least one landing in the season.
Active registered licence holders	Any person registered with DFO who uses fishing gear authorized by a commercial fishing licence. This definition does not cover fishermen helpers.
Active vessel	A vessel for which at least one landing in the reference year has been counted.
Actual deviation	Difference between data for the year under consideration and the preceding year.
Administrative regions	Regions defined by DFO. In this publication, we refer to the Atlantic administrative regions: Quebec Region: Encompasses the province of Quebec Gulf Region: Encompasses coastal areas of the Gulf in New Brunswick and Nova Scotia, as well as the Province of Prince Edward Island Nova Scotia: Encompasses the waters of the Bay of Fundy, the Scotian Shelf and Georges Bank which is the ocean side of Nova Scotia Newfoundland Region: Encompasses the geographic sector of the same name.
Atlantic Coast	Covers the Quebec, Gulf, Nova Scotia and Newfoundland regions.
Average Price	Total value of all landings sold divided by the total weight landed.

Buyer	Person or firm that commercially purchases fish directly from fishermen.
Certified plant	Any place that fish is processed for export or stored before exporting.
"Commercial fisherman" (southern Gulf)	In the Gulf, a commercial fisherman is a registered fisherman who does not take part in the fisheries fished by vessels with an LOA of 15.2 m (50') or longer and does not meet the requirements of a bona fide full-time or part-time fisherman.
Commercial fishing licence	Designate an instrument by which the Minister of Fisheries and Oceans authorizes, pursuant to his discretionary authority under the Fisheries Act, grants permission to a person including an Aboriginal organization to harvest certain species of fish or marine plants subject to the conditions attached to the licence. This is in no sense a permanent permission; it terminates upon expiry of the licence. The licensee, is essentially given a limited fishing privilege rather than any kind of absolute or permanent "right or property".
Conversion factor	Ratio used to convert the weight of a product or form of a product on landing into equivalent live weight.
Core	In order to qualify as a member of the core group, a person must meet the following criteria: - be the head of an active fishing enterprise, i.e., have fished full time for the previous two years (1994 and 1995) and have a vessel in the fishery; and - hold either two key licences, OR one key licence and in the years 1993, 1994 and 1995, have fished for 10 weeks minimum reported landings of \$5,000 from their own licence for vessels less than 35' and of \$10,000 from their own licences for vessels longer than 35', OR one key licence and, in two of the years 1993, 1994 and 1995, have earned at least 75% of their income from fishing

License holders who meet the eligibility criteria for the Atlantic Groundfish Strategy (TAGS) or the Northern Cod Adjustment and Recovery Program (NCARP) may use the TAGS or NCARP qualifying years instead.

Key licences are defined as shrimp, crab, lobster, groundfish other than handline, scallop, herring and, on the Lower North Shore, capelin.

Division	NAFO (Northwest Atlantic Fisheries Organization) divisions.
Fishing day	Day in which fishing gear was used with the goal of catching fish to sell.
Gear	Any equipment used to catch fish.
Gulf of St. Lawrence	Coastal areas of the Gulf in New Brunswick, Nova Scotia, western Newfoundland and southern Labrador, as well as Prince Edward Island and Quebec.
ITQ	Individual transferable quota
Landed value	Monetary value of the recorded landed quantity, that is, the landed quantity multiplied by the unit price, or the value supplied by the buyer.
Landing	Quantities of fish and shellfish (molluscs and crustaceans) landed, excluding discards, measured as live weight.
Live weight	Weight (round weight) of a live fish, which can be estimated, if necessary, on the basis of the form at landing using a standard conversion factor.
Non-core	Any fisherman not qualified for membership in the core group.
Non registered licence holders	Non registered holders of active licence refer only to companies, aboriginal fishermen, successions and to licences bought back by DFO.

Other items	Includes sea urchins, lumpfish caviar, scallop roe, other seafood, and seal products.
Outside the Gulf of St. Lawrence	Waters of the Bay of Fundy, the Scotian Shelf and Georges Bank that is, the ocean side of Nova Scotia as well as the province of Newfoundland, not including the west coast and southern Labrador.
Quota	For a given species and fishing area, the catch limit set for a segment of the commercial fleet.
Specialized enterprise	Fishing enterprise that has recorded at least 25% of the average value of landings of its reference fleet.
Supplementary purchase slips	These data are used to compile all landings not recorded on general purchase receipts. This information comes from estimates from four different sources: Fish processed by fishermen Direct sales to the public Fish used as bait by fishermen Other landings (including personal consumption by fishermen and their families and sport fishing)
Value	Statistics on value are expressed in current Canadian dollars.

***CATCH PORTRAIT OF
QUEBEC SECTOR***

Portrait of Quebec Sector catches for 2004

The value of Quebec landings was totalling 200 M\$ in 2004, which constitutes an historical record year. In comparison with 2003, the total value of landings has recorded an increase of 18 %, attributable in a large part to an increase of the value of the snow crab catches in 2004. Thus, the value of snow crab landings has increased of 19 M\$ representing 24 % more than the previous year. As for the value of lobster landings, it has increased of 3 M\$, representing an increase of 6 %. An increase of 6 M\$ for the value of shrimp is also noted as well as an increase of 4 M\$ for groundfish. Concerning the landings, they passed from 57 000 to 64 000 tons in 2004, representing an increase of 12 %. This rise is attributable to the increase of 53 % of groundfish landings (mainly cod), of 29 % of shrimp, 21 % of snow crab and 6 % of lobster.

Evolution of Quebec Fishing Industry landings 1985-2004

Source : DFO, Quebec Region

Note : Supplementary slips are included in the landings.

Source : DFO, Quebec Region

Note : Supplementary slips are included in the landings.

The breakdown of the value of landings according to the species shows that snow crab stays on top with a value of 98 M\$, representing 49 % of the total. The lobster is the second species in importance with a value at landings of approximately 50 M\$. In the third place, we have shrimp landings with a value of the order of 29 M\$. Together, these three crustaceans were representing 89 % of the value of landings in 2004. Far behind, the value of landings for groundfish and pelagic fish were respectively of 11 M\$ and 3.5 M\$ in 2004.

(1) The buyers are filed according to their physical location.

RESOURCE
ACCESSIBILITY

Resource accessibility

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

TOTAL: Snow Crab			38 532	15 061	37 369	40.30	

(1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established by the Department of Fisheries and Oceans.

(2) This global quota is subdivided into individual quotas and is set for Quebec fishers only.

(3) This global quota is subdivided into individual quotas.

(4) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.

(5) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.

(6) Unit 1 is grouping together 4RST, 3PN divisions (January to May) and 4Vn division (January to May) and Unit 2 is grouping together 3Pn division (June to December) and 3Ps, 4Vn divisions (June to December)

(7) For this species only, quantities are indicated in meat weight.

(8) Considering that these are individual quotas, duration periods are not specified.

(9) In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.

Average landed price

The average landed price by species as indicated here reflects the prices paid to fishermen and is determined by dividing the total value of all landings by the total landed weight.

The average price takes into account the condition of the catch at landing. The advantage of this method is that the significance of the price given can be specified. An identical approach is used for each of the maritime sectors.

It should also be pointed out that the average prices in the following tables exclude supplementary purchase slips, which explains why no figure is given for some species.

TABLE 14

3) The posted value represents all landings of *Pandalus borealis* shrimp and *Montaguia* shrimp as a whole.

***STATISTICAL PROFILE
OF SEAL HUNT***

Statistics on Seal Hunt Activities

In this section we are presenting an overview of the activities related to seal hunt in the Quebec Region. You will find information concerning the number of licences issued per type and maritime areas as well as information concerning the landings of harp seal by fleet, and finally, data relating to the seal hunt observation activities.

Summary of the seal hunt, Magdalen Islands, 2004 season :

Although the hunt season extends from November 15 to May 15 of each year, the hunt activities are concentrated on a one-week period. This explains why the vessels over 35' have been hunting from March 23 to March 31, at which date they had already reached the Gulf quota for this category. Activities for the vessels less than 35' have closed on April 9.

There was a total of 37 vessels over 35', based in Magdalen Islands, who participated and have been hunting in Prince Edward Island, where the herd was. Also, about fifteen vessels of less than 35' have been hunting along the coasts of the Magdalen Islands. The landings were constituted of seals of 1-year-old or less, commonly called « *Beaters* ».

Summary of the seal hunt, North Shore, 2004 season :

On the Quebec North Shore, 3 vessels over 35' and approximately 44 inshore hunters have participated in the hunt activities in 2004.

The majority of landings taken by vessels less than 35' have started on May 1st (end of season quota for vessels less than 35'), on the Quebec Lower North Shore, while for the vessels over 35', 75% of the landings were attributed to the Mid North Shore Sector.

Statistics and graphics 2003-2004 :

In 2003 and 2004, the total authorized allocation was of 350 000 seals out of which 98 001 were for the Gulf of St. Lawrence. Out of this number, 63 636 seals were reserved for vessels over 35'.

In 2004, the landings in Quebec Region have reached 39 329 seals, distributed as follows :

Fleet	Magdalen Islands		North Shore		Gaspé Peninsula		TOTAL - QUEBEC	
	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels
< 35'	2 199	13	2 588	N/AV	0	0	4 787	N/AV
> 35'	28 366	37	4 068	3	0	0	32 434	40
< 35' - End of season	0	0	2 108	N/AV	0	0	2 108	N/AV
TOTAL	30 565	50	8 764	N/AV	0	0	39 329	N/AV

Comparison with year 2003 :

In 2003, the landings in Quebec Region have reached 16 235 seals, distributed as follows:

Fleet	Magdalen Islands		North Shore		Gaspé Peninsula		TOTAL - QUEBEC	
	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels	Number of seals captured	Number of vessels
< 35'	39	0	1 383	N/AV	0	0	1 422	N/AV
> 35'	14 513	10	◇	◇	0	0	14 513	◇
< 35' - End of season	0	0	300	N/AV	0	0	300	N/AV
TOTAL	14 552	10	1 683	N/AV	0	0	16 235	N/AV

N.B : The number of vessels is an approximation. It has been calculated from vessels identified at DFO

Daily evolution of catches, Quebec Region

Quebec Region Sealers' catches and Gulf quotas

Evolution of catches, by area, per year :

Catches of Harp Seal in Quebec Region 1986-2004

N.B : Gaspé Area has no catch for these years

Statistics, commercial licences :

Number of commercial sealing licences issued, by type and by maritime area (2003-2004) :

Number of licences issued	Magdalen Islands		North Shore		Gaspé Peninsula		Total Québec	
	2003	2004	2003	2004	2003	2004	2003	2004
Commercial Professional	741	755	613	708	52	57	1 406	1 520
Commercial Hunter helper	155	184	243	176	8	19	406	379
Personal usage	5	6	486	459	73	70	564	535
TOTAL	901	945	1 342	1 343	133	146	2 376	2 434

Note : Licences are not all active ones.

Statistics, licences to observe the seal hunt:

Each year, observers come to watch commercial seal hunt activities. In order to get to the hunt sites, observers must obtain an observer licence and respect a few conditions included in the licence. An observation licence is valid for a day and can be renewed on request. In 2004, all observers have been able to get on the ice and some have been able to renew their licence up to 4 times. People from Canada, United States, Central America and from Europe came to observe the commercial hunt. Most of them were journalists and photographers.

Seal hunt observers licences	2003	2004
Number of requests received	12	51⁽¹⁾
Number of licences issued	7	45
Number of days of observation	5	7

⁽¹⁾ Some people did not make any follow up on their request.

Statistics, product processing :

In 2004, a little more than 75% of the landings of the Quebec Region hunters have been sold and processed within Quebec Region. The balance of the landings have been forwarded towards Newfoundland.

In Quebec, pelts represent the essential part of the value of the processed products. These pelts, once the fat is taken out and once tanned, are destined to Asia and the Eastern Europe. The fat taken out of the pelts is then transformed into oil. Small quantities of meat are also harvested and processed for the local market and Quebec market (specialised market), as well as for personal consumption.

***ECONOMIC PROFILE OF
QUEBEC MAIN
FISHING FLEETS***

Economic Profile of Quebec Main Fishing Fleets

The Annual Statistics Review 2003-2004 proposes a section intended to the Quebec main fishing fleets. You will find in the following pages, information related to the size of the fleets, the manpower, the fishing effort as well as the average landings for these various Quebec fleets.

In order to characterize each fleet, we have classified them by main species landed, and in some cases, by fishing area, gear type and vessel length. For example, for a fisherman who is fishing groundfish, pelagic fish and crustaceans, we will classify him in the fleet where he gets the higher value for his landings, being groundfish, pelagic fish or crustaceans. In other respects, landings and average prices are always calculated according to a fleet considered as "specialized" or according to a group of specialized enterprises. The expression "specialized" refers to fishing enterprises where their landings represent at least 25% of the average value of their fleet.

In addition, we want to inform you that the data concerning the fleets presented in the next section exclude the statistics for aboriginal fleets to ensure that the average value of the landings could be calculated from comparable data.

At last, please note that Scallops fleets of the North Shore (fisheries on individual quotas and competitive fisheries), of the Gaspé Area and Magdalen Islands have very few participants. Consequently, data concerning these fleets cannot be disclosed in this review for confidentiality considerations.

Snow Crab	Round.....	6.248	6.780	8.5

2003 - 2004 Landings

St. Lawrence

The St. Lawrence Sector is distinguished by a low level of marine fishing activity. Landings made in 2003 and in 2004 for the sector between Anse à Gilles and Cap à l'Original on the south shore, and between Cap Tourmente and Baie Sainte Catherine on the north shore, represented respectively 178.9 and 120,4 metric tons for an assorted value 0.34 and 0.162 million of dollars. Thus, 2004 landings are lower in quantity and their value has decreased substantially of 52 % compared to 2003.

In 2004, we had 24 active registered licence holders, one less than in 2003. Concerning the number of buyers, we have 3 buyers in 2004 compared to 2 buyers in 2003.

To abide by confidentiality regulations, it is not possible for the Department to reveal any information concerning St. Lawrence sector landings. The small number of participants in marine fishery activities as well as the small amount of catches justify the application of such a confidentiality measure.

2003 - 2004 Landings

Northern Quebec

The Department of Fisheries and Oceans has no registered data for 2003 and 2004 for the Northern Quebec Sector.

***PRODUCTION AND
MANPOWER IN PLANT***

Plant production data

This section concerns fish and seafood processed in Quebec in 2003 and 2004. In this review, production refers to any processing by a plant or any sale of a product to a merchant who buys directly from fishermen. Most of the enterprises listed here are located in the Gaspé, the Magdalen Islands or on the North Shore. Our data-collection network is concentrated in these three regions, although we did obtain information from a few firms in the Quebec City and Montreal areas.

The volume of the various products listed is based on information provided by each of the processing plants and merchants. Value is calculated on the basis of selling prices for each type of seafood.

Some figures were adjusted if there were discrepancies with the rest of the available data. When making these adjustments, we used the following information as reference points: purchase value of raw material, value of same types of products when processed and, wherever possible, from the same geographic sector, the selling price of the preceding year taking into account variations in prices and inflation.

The data are given for the whole of Quebec and by maritime sector. Note that for reasons of confidentiality, in some cases we have grouped a number of products together.

Plant workforce data

The number of employees in the 2003-2004 statistical review represents the maximum number of people who worked in the same plant over the course of the year (the month with the highest number of employees was used as the yardstick). This method of accounting is based on the following definition of an employee: "An employee is any person working for a definite period for an employer operating an establishment that processes or deals in any seafood product."

The annual employment survey of processing plants is the source of our information on employment. A few plants, however, provided us with employment information over the telephone. In a few rare cases, we made estimates, based on information gathered by DFO staff.
